

Shubham Bhandari

Full-Stack Developer | AI & Data Enthusiast

Dehradun, India | +91 7819866931 | shubhambhndari@gmail.com

GitHub | LinkedIn

Summary

BCA student focused on full-stack development, backend engineering, and AI-driven data applications. Experienced in building REST APIs, authentication systems, database-backed applications, semantic search, and data analysis solutions. Interested in applying software engineering and data-driven approaches to solve practical problems.

Education

Bachelor of Computer Applications (BCA)

Tula's University, Dehradun

Class XII: 70%

2024–2027

CGPA: 7.83/10

Class X: 83%

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, NestJS, FastAPI, REST APIs

Databases: PostgreSQL, MySQL

AI & Data: Elasticsearch, Sentence Transformers, NLP, Semantic Search, Data Analysis

Tools: Git, GitHub, Docker, JWT

Experience

Data Analytics Intern — InAmigos Foundation

Jul 2026 – Jul 2026

Remote

- Worked on real-world data analysis tasks, including cleaning and organizing datasets to support decision-making.
- Created concise reports and collaborated with a remote team to deliver assigned tasks on schedule.
- Strengthened analytical, problem-solving, and communication skills through structured project work.

Projects

Pyramid — Full-Stack Task Management System

[GitHub](#) [Live Demo](#)

- Built a full-stack task management platform with Kanban/list views, projects, subtasks, comments, search/filtering, and responsive UI.
- Implemented a NestJS REST API with JWT guest authentication, TypeORM, PostgreSQL, validation, rate limiting, Helmet security headers, and owner-based data isolation.
- Developed the frontend using Next.js 14, React 18, TypeScript, and Tailwind CSS; deployed the frontend through Vercel.

AI-Powered E-Commerce Search Engine

[GitHub](#)

- Built an e-commerce search engine combining keyword search, typo tolerance, and AI semantic search to understand query intent.
- Developed FastAPI REST endpoints and integrated MySQL, Elasticsearch, Sentence Transformers, and Docker for search and data processing.
- Implemented hybrid search and product filtering across a dataset of 1,465 Amazon India products with a React frontend.

LiveCode — Real-Time Collaborative Code Editor

[GitHub](#)

- Worked on a browser-based collaborative coding environment supporting real-time code editing, project persistence, terminal access, and communication.
- Used React/Next.js, Node.js, Express.js, MongoDB, Monaco Editor, Xterm.js, and Docker-based isolated code execution.
- Implemented collaborative editing and communication features for an interactive browser-based development environment.

Certifications & Achievements

- Complete Full-Stack Web Development Bootcamp — Udemy** Aug 2026 [Certificate](#)
- Mobile App Development with Flutter & Dart — Tula's Institute / Campus Sutras** Apr 2026
- The Crypto Heist CTF — ThunderCipher** Jul 2026
- 3rd Place — Code Sprint at Utkrisht 2024**, college-wide C programming competition.
